

Software & Subscriptions Policy

Effective 2026-01-01. Applies to all software, SaaS, and digital-service purchases.

1. Individual SaaS subscriptions under \$50/month may be expensed directly by the employee without prior approval. Category: Software & Subscriptions.
2. Any subscription or license at or above \$50/month requires IT approval before purchase, on the grounds of data-security review and license-count tracking.
Category: Software & Subscriptions.
3. Cloud infrastructure and hosting costs (compute, storage, bandwidth) are always
Category: Software & Subscriptions, regardless of amount.
4. One-time software purchases (perpetual licenses, plugins, developer tools) follow the same \$50 approval threshold as recurring subscriptions.
5. Domain registration and DNS services are Category: Software & Subscriptions.
6. Hardware purchased to run software (laptops, monitors, peripherals) is never this category — see the Equipment & Hardware category instead.
